Lunchbytes - onderwijsvisie

In these meetings ambitions from the vision for education are discussed.

Lunchbytes - LLRC

Teachers will talk about different ways of working in language education.

Lunchbytes - ECOLe

Teachers will talk about the implementation of IT in education.

The world beyond university

The students of Jaap de Jong and Alexander Pleijter work on a portfolio in which they showcase their work and reflect on the job market. Their students also learn to use their scientific knowledge in a practical way by contributing to the nieuwscheckers.nl website.

Wednesday 26 September

Long-distance learning

Siavash Rafiee Rad will discuss how technology may be used to address challenges teaching languages at Higher Education has encountered. He will also introduce a newly developed language-teaching platform for long-distance learning.

Thursday 4 October

Interactive lectures thanks to IT

Standard lectures often don't have much interaction. How do you create meaningful interaction with your students? Jeroen Touwen and Bram Hoonhout show how their students come to class well prepared and discuss mock exam questions with each other.

Thursday 8 November

Skills Hub

The digital world asks for new skills. How do you translate these skills to your course? Mirjam de Bruijn and Meike de Goede will talk about Skills Hub: a platform in which, next to text, video, audio, photography are highlighted as 'writing' techniques.

Tuesday 9 October

Look up from your book

Practising grammar is associated with doing exercises in a book. This can be done more interactively. Szilvia Szita will show a few techniques that allow students to look up from their books and create meaningful interactions around grammar exercises.

Monday 15 October

Education from the 21st century

Hans Theunissen elevates his teaching to the 21st century with online learning modules in which students work with primary sources. Furthermore, he uses online databases with which students can effectively work on translations.

Monday 3 December

What can I do after my studies?

Maria Carmen Parafito Couto and Lisa Theunissen talk about how they visualize the relation between courses and the future job market. They also discuss how they use alumni to show the students the positions they can hold after finishing their studies.

To be announced

Teaching language fluency

Nivja de Jong discusses research on fluency in a foreign language. Why, and to what extent is it harder to be fluent in a foreign language? What does research about promoting fluency tell us? How can this help teachers in their language-teaching practice.

Thursday 22 November

Prestate better; Video quizzes

Video is often used in education. How do you make sure students watch assigned video's and learn from them? Eloise Ruby and Abhishek Avtans will showcase how they stimulate students to think, using video quizzes on Blackboard.

Friday 14 December

Modules

This year ECOle offers two modules, which consists of three sessions and two assignments.

Location: Reuvenplaats 3, LLRC room 122 | **Costs:** Modules are free, including lunch.

Sign up: www.bit.ly/ecolehum

1. Digital Assessment

Digital Assessment is being used to give students the opportunity to practice with the materials and as a way to take exams. From evaluations it follows that weekly testing leads to better scores on the exams. Digital assessment can also lighten the workload of teachers. The module is organized in collaboration with Tirza Schipper, who has successfully been applying digital assessments for over two years.

Session 1

You will set up a question database. We will discuss: How to use the database? Which types of questions fit in and how do you give feedback on the answers?

Thu 1 nov 12:00-14:00

Session 2

You will generate exams by making test recipes. You will make your own test recipes with which your test subjects will take an online test.

Thu 15 nov 12:00-14:00

Session 3

We will look at the results from your digital assessment experiments. Furthermore you will be instructed in how to check the answers to open questions.

Thu 29 nov 12:00-14:00

2. Flipping the Classroom

Flipping the Classroom is a teaching method in which the instructions normally given during class, are presented online. This way the time spent with the teacher is used more optimally. The Flipping the Classroom-module will be organized in collaboration with Frans-Willem Korsten, who has been applying Flipping the Classroom enthusiastically for the past two years.

Session 1

What is Flipping the Classroom and how can this be applied? How do you get students to work in an active manner and how does it impact the role of the teacher?

Thu 10 jan 12:00-14:00

Session 2

You will be making a Flipping the Classroom-design for your own course. We will also delve into the practical side: developing a knowledge clip.

Thu 17 jan 12:00-14:00

Session 3

We will discuss the course designs. At the end of the meeting you will have a Flipping the Classroom-design that you will be able to use in your own course.

Thu 31 jan 13:00-17:00
