25 till 29 May

Student members of the Faculty Council of Humanities

Student party statements on:

Education

CSL
Everyone should be able to follow proper and impartial education. The university must commit to involving the students with a (study) disability.

DSP
We want to ensure that both online and in person classes meet the standards in terms of proper education, and safeguarding the privacy of students and teachers.

LSP
The quality of education cannot reduce because of the current situation, every student has the right on clear and good education, despite the current crisis.

LVS
Electives credits should be moved completely to the first semester of (43), so that a minor elsewhere, an internship or a stay abroad fits into the study schedule.

ONS
It is important that the faculty provides the possibility and the room for students to develop themselves. Studying and side activities must go together.

Student members of the Faculty Council of Humanities

Student party statements on:

Infrastructure

CSL
CSL represents “blended” learning. A full package must be created that contains both digital education and education at the faculty, with the possibility to switch between the two.

DSP
DSP - The Hague continuously addresses the lack of facilities (like study space) in Wijkhaven, and aims to improve connection between the two university cities.

LSP
LSP - When physical education is restarted, the build of the Humanities Campus and the internal constructions should not be a disturbing factor to students.

LVS
LVS - We are one faculty in two cities. All faculty activities should be open to all students or be organized in both cities.

ONS
ONS - The Humanities Campus project must be closely monitored and sustainability must be guaranteed. The provision of study places is important in this respect. In addition, the transition to brightspace must go smoothly.

Student party statements on: Internationalisation

**CSL**
The integration and inclusion of international students needs to be improved, for instance by offering free language courses. Dutch bachelor degrees should in fact be able to be followed in Dutch.

**DSP**
As an international party, we want to be the link between an internationalising student body and Leiden University, to ensure proper support for international students.

**LSP**
We should carefully watch over our international students, the crisis cannot stand in the way of the education of students who are currently stuck abroad.

**LVS**
International students should be able to find their way within the university and the city. Information and documents should therefore always be bilingual and language courses for free.

**ONS**
Diversity must go hand in hand with inclusion. In order to have a good environment for all students, it is important that internationals are included properly. This means that all facilities are available and visible to them.
