## Special Note

### NWO to update its data management protocol in January 2020

Starting from 1st January 2020, NWO will update its data management protocol, reinforcing its longstanding commitment to Open Science. The basic principles will remain. NWO emphasizes the importance of responsible data management and expects researchers to carefully manage data resulting from NWO-funded research and prospectively plan for data sharing and preservation.

### NWO introduces narrative CV format in the 2020 Vici round

NWO is going to introduce a uniform narrative curriculum vitae format in the upcoming Vici round. This measure dovetails with a new approach for recognising and rewarding scientists and follows on from the position paper Room for everyone's talent, which NWO recently published with its partners. Moreover, NWO has had good experiences in recent years with the narrative CV in the pre-application pilot for the Veni in the NWO domains SSH, AES and ZonMw.

### Urgent onderzoek

Het NRO heeft in toenemende mate te maken met het uitzetten van onderzoek naar urgente vragen met een korte looptijd en een relatief klein bedrag waarbij het van belang is dat er snel gestart kan worden. De gebruikelijke procedure is hiervoor ongeschikt, onder andere vanwege de grote investering aan de kant van aanvragers en de langere doorlooptijd. Het NRO heeft daarom een nieuwe procedure ontwikkeld voor het snel starten van relatief kort onderzoek naar urgente vragen.

Vanaf 19 november 2019 kan het NRO de registraties in de database gebruiken voor het uitzetten van kleine subsidies. We raden onderzoekers daarom aan om zich zo spoedig mogelijk in de database te registreren.

## Impact

### Knowledge utilisation to create impact - NWO

Besides scientific impact, research should also have a societal impact and contribute to solving societal issues. Within the social sciences and humanities domain, much knowledge and experience has been gained in facilitating the societal impact of research, for example within the many

thematic programmes and international collaborations.

Research manuals have been developed to help social sciences and humanities researchers set up collaborative programmes and projects.

### Call: Transnational actions on asylum, migration and integration

The European Union's objective to constitute an area of freedom, security and justice should be achieved, inter alia, through common measures framing a policy on asylum and immigration, based on solidarity between Member States, which is fair towards third countries and their nationals.

Deadline: 30 January 2020

❖ **Fostering the integration of persons in need of protection through private sponsorship schemes**

As part of the EU efforts to provide more legal channels for the growing number of displaced persons in need of international protection, the European Commission invited Member States to explore ways to establish private sponsorship schemes where civil society organisations provide support for the settlement and integration for persons in need of protection.

[More information](#)

❖ **Social orientation of newly arrived third-country nationals through involvement of local communities, including mentoring and volunteering activities**

Upon arrival and in the very early stages of the integration process, migrants often encounter difficulties in their social orientation, i.e. in adapting to a new local, social and administrative environment, building a social network, as well as in dealing with authorities, public and private services or handling paperwork. These difficulties can slow down the integration process and affect its outcome.

[More information](#)

❖ **Social and economic integration of migrant women**

Women can be crucial facilitators in the integration process. When they have children, they are often multipliers in the areas of education and employment and play an important role as agents for the transfer of values. The positive impact of migrant women' employment on the social outcomes of their children is well documented.

[More information](#)

❖ **Support to victims of trafficking in human beings**

Providing better access to and realising the rights of the victims of trafficking in human beings is a priority under the 2017 Communication 'Reporting on the follow-up to the EU Strategy towards the eradication of trafficking in human beings and identifying further concrete actions.

[More information](#)

❖ **Awareness raising and information campaigns on the risks of irregular migration in selected third countries and within Europe**

The EU Action plan against migrant smuggling states that raising awareness of the risks of smuggling and irregular migration is crucial for preventing prospective migrants and asylum seekers, including people in more vulnerable situations such as children, from embarking on hazardous journeys towards the EU.

[More information](#)

❖ **Protection of children in migration**

Migrant children continue to arrive to the EU in relatively large numbers. From the 34,376 irregular migrants who arrived to the EU by land or sea or land in the first half of 2019, 23% are children.

[More information](#)

❖ **Transnational projects by Member States for training of experts in the area of asylum and immigration**

In the area of asylum and migration, the national administrations of EU Member States are confronted with a wide range of different tasks and activities requiring high level of expertise. Continued training and learning opportunities for personnel are key to strengthen their knowledge and skills and ensure they will perform their job at a satisfactory level.

**Bridging the divide in health research and innovation – boosting return on investment**

The Innovation Union Scoreboard reveals significant disparities in terms of research and innovation performance among the different member states and regions within the European Union. The disparities are equally present in health research and innovation which unfortunately also translates into lower participation in the Union's research and innovation framework programme, Horizon 2020.

Deadline: 7 April 2020

**Call: Digital transformation in Health and Care**

This call aims at supporting the management of health and wellbeing while empowering the participation of citizens and facilitating the transformation of health and care services to more digitized, person-centred and community-based care models, thereby enabling better access to healthcare and the sustainability of health and care systems. Secure and interoperable data as an enabler together with state of the art technologies such as Artificial Intelligence and Big Data analytics are essential building blocks for the digital transformation of health and care as addressed by this call

Deadline: 22 April 2020

❖ **Personalised early risk prediction, prevention and intervention based on Artificial Intelligence and Big Data technologies**

The ageing of the population together with the rising burden of chronic conditions (incl. mental diseases) and multi-morbidity bring an ever increasing demand to strengthen disease prevention and integrate service delivery around people's needs for health and social care.

[More information](#)

**International cooperation in smart living environments for ageing people**

Demographic change and the ageing of the population create new heterogeneous challenges for society and, in particular, for ageing people. On top of the health-related age impairments such as poor health, cognitive impairment and frailty, ageing people are at risk of facing situations leading to potential social exclusion with considerable negative consequences for their independence, quality of life, those who care for them, and for the sustainability of health and care systems.

[More information](#)

❖ **Pre-commercial Procurement for Digital Health and Care Solutions**

Digital solutions supporting a continuum of care across a range of health and care services can relieve the pressure on governments to provide more cost-effective health and care systems by improving the use of healthcare and health outcomes. In this context the challenges are to network, lead and facilitate health systems research, innovation and digitization in view of addressing key areas of interventions in health and care services including health promotion and disease prevention.

[More information](#)

- ❖ **Scaling up innovation for active and healthy ageing**  
The European Commission has promoted scaling up of digital innovation for active and healthy ageing both with research and innovation funding under Horizon 2020 and previous Framework Programmes and with its support for stakeholder partnerships like the European Innovation Partnership on Active and Healthy Ageing with its Regional Reference Sites.

### KNAW Academy advisory report on tracking the impact of research

Consider networks and users when assessing impact of research.

When appraising the societal impact of scientific research in advance, it is important to consider the interactive networks and potential users. That is one of the three recommendations made in the report Maatschappelijke Impact in kaart [Tracking societal impact], published today by the Royal Netherlands Academy of Arts and Sciences. The point is not to chart the impact itself, in other words, but the factors and processes that increase the potential for societal impact.
