Your ABP Pension

Pension Accrual

- ✓ Each year you build up pension based on the fulltime salary of that year
- ✓ Working part-time = part-time pension
- ✓ All amounts together = total pension
- ✓ The aim of ABP is to increase your pension every year

Pension Accrual

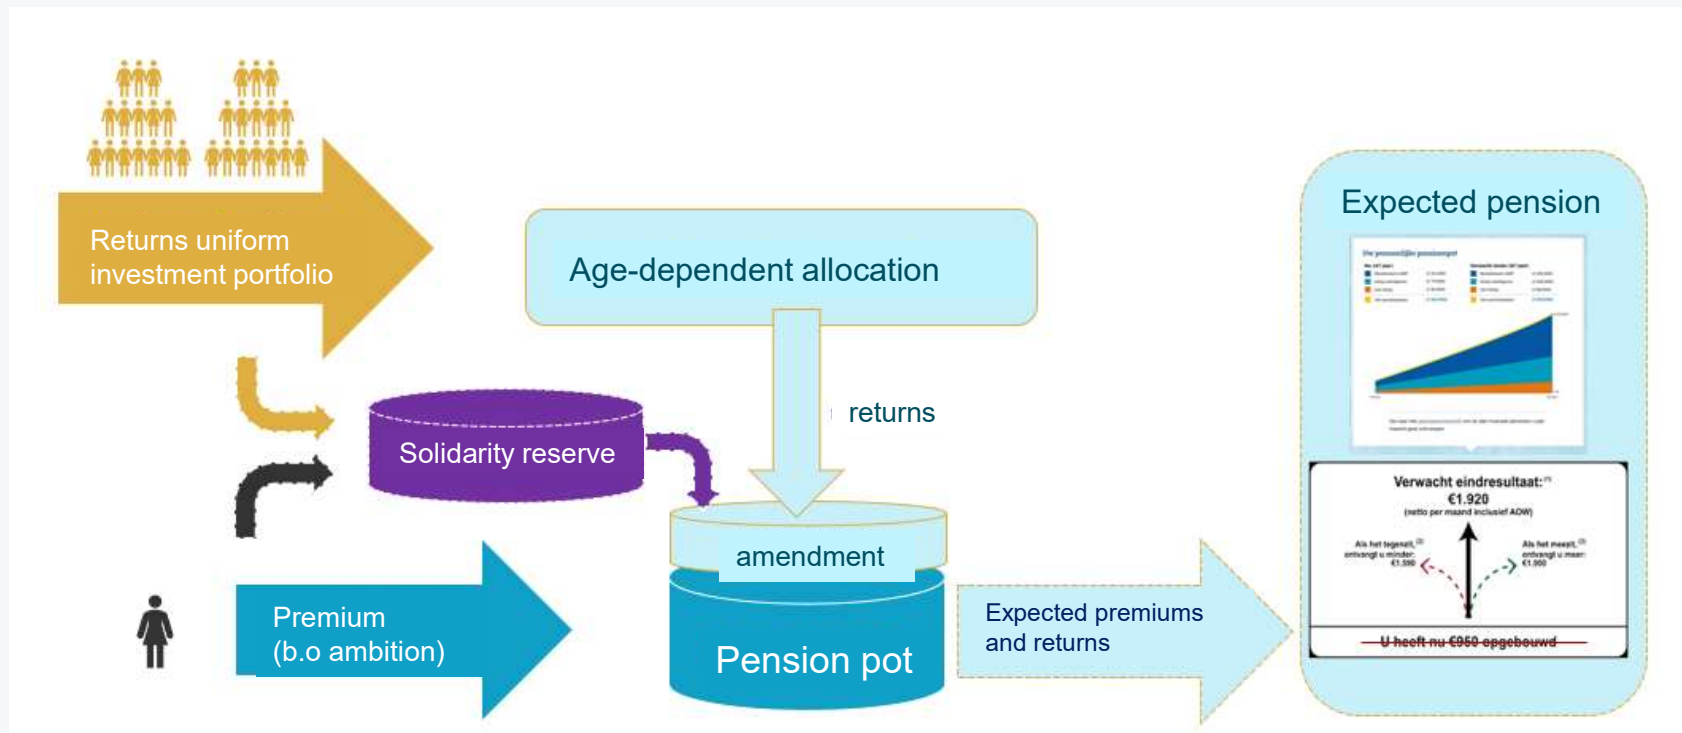

Formula

- ✓ Percentage
 - How much is the annual pension accrual
- ✓ Franchise
 - The part of your salary we do not take into account when we calculate your pension.
 - No premiums are owed over this amount

Example

Salary	€ 56.000
Franchise	€ 16.350
Percentage	1,875%
Pension accrual = $(56.000 - 16.350) \times 1,875\%$	
= € 743 (fulltime job)
